PROFESSIONAL PROFILE

I am a **Data Analyst with a background in Mechatronics Engineering and experience analyzing operational, quality, risk, and customer service data.** I have worked with large datasets to identify patterns, recurring causes, and improvement opportunities, transforming scattered information into reports, KPIs, and visualizations that support decision-making.

I have experience with **SQL, Python (Pandas, NumPy), Excel, Google Sheets, Power BI, and Looker Studio**, applied to data cleaning, analysis, and visualization, report automation, KPI tracking, and trend identification. In my recent experience, I analyzed **1,000+ customer complaints annually across datasets with up to 60 variables**, and developed automations that reduced processing time and improved access to relevant information for cross-functional teams.

My key differentiator is combining **data analysis with process optimization**, allowing me to understand both the data and its impact on operations and business outcomes. I am seeking opportunities as a **Data Analyst or Business Data Analyst**, where I can apply analytical thinking and a process-oriented approach to turn data into clear, actionable insights.

TECHNICAL SKILLS

Programming & Databases: Python | SQL | Pandas | CTEs | JOINS | Cohort Analysis | Query Optimization | C, C++ (Arduino)

Data Analysis: Excel | Google Sheets | Data Cleaning & Transformation | Exploratory Data Analysis (EDA) | Statistical Analysis | Trend & Pattern Identification

Data Visualization: Power BI | Looker Studio | Tableau | Executive Dashboards | Operational KPIs & Metrics

Automation: Google Apps Script | Process Digitalization

ERP Systems: SAP, Oracle Quality Management

Other tools: Minitab, Matlab, Solidworks CSWA, TIA Portal, Proteus

Methodologies: Scrum | Daily Management System (DMS)

TECHNICAL EXPERIENCE

Data Analyst | TripleTen

03/2026 - 09/2026

- Analyzed and transformed data using **SQL and Python (Pandas, SciPy)** to identify patterns, trends, outliers, and business insights.
- Queried and explored data with **SQL** to analyze financial KPIs and user journeys, supporting the identification of improvement opportunities.
- Performed **data cleaning, preparation, and structuring** in Python, ensuring consistent and analysis-ready datasets.
- Applied **statistical analysis, correlation analysis, and hypothesis testing** to explore relationships between variables and validate business questions.
- Created **visualizations and interactive dashboards** using **Matplotlib, Seaborn, Plotly, and BI tools**, communicating findings clearly to stakeholders.
- Completed end-to-end data analysis projects, documenting processes and findings using **Jupyter Notebook and GitHub**

PROFESSIONAL EXPERIENCE

Risk & Customer Service Analyst | Softys

June 2025 – February 2026

- Analyzed **1,000+ quality and operational complaints annually**, working with datasets containing up to **60 variables** in Google Sheets and Looker Studio to identify recurring patterns, potential root causes, and process improvement opportunities.
- Automated weekly reports in **Google Sheets**, reducing manual processing time from **40 to 15 minutes per report**, saving more than **16 hours per month** and allowing more time for data analysis.
- Developed an interactive **Looker Studio dashboard** to track complaints, trends, and operational KPIs, improving access to relevant information for leaders and cross-functional teams.
- Transformed customer and quality case data into clear metrics to support issue prioritization, corrective action tracking, and **data-driven decision-making**.

Junior Quality & Process Control Lead | Softys

July 2024 – May 2025

- Digitized process monitoring across **7 production lines** using Google Forms, Google Sheets, and **Google Apps Script**, improving the availability, traceability, and accessibility of operational data.
- Analyzed **300+ critical process variables** using statistical methods to establish operational benchmarks, detect deviations, and support the early identification of anomalies.
- Built dynamic **Power BI dashboards** to visualize production KPIs, trends, and variable behavior, translating complex operational data into clear visual insights for production teams.
- Collaborated with Production and Quality teams to interpret process data, identify improvement opportunities, and track actions aimed at improving **operational stability and efficiency**.

PROJECTS

Comprehensive Strategic Analysis for RappiPlus | 2026

[\[https://github.com/mfernandasoni/RappiPlus_from_data_to_business_decisions\]](https://github.com/mfernandasoni/RappiPlus_from_data_to_business_decisions)

- Description: Conducted an end-to-end strategic analysis of RappiPlus to assess profitability, marketing performance, conversion funnels, customer retention, and the impact of a checkout UI redesign.
- Stack: Python, Pandas, SQL, Power BI, Jupyter Notebook, Statistical Analysis
- Impact: Analyzed \$9.64M in revenue and \$2.87M in marketing investment, identifying \$2.94M in net profit; pinpointed payment information registration as the primary funnel bottleneck (86.71% conversion) and statistically evaluated the redesign using a Z-test, finding no significant change in conversion.

Urban Mobility & Economic Productivity in LATAM | 2026 [\[github.com/mfernandasoni/Urban_Mobility\]](https://github.com/mfernandasoni/Urban_Mobility)

- Description: Analyzed the relationship between urban traffic congestion and economic productivity across LATAM cities by integrating traffic, GDP, and unemployment data.
- Stack: Python, Pandas, Jupyter Notebook, Exploratory Data Analysis, Statistical Analysis, Seaborn, Matplotlib
- Impact: Found no linear correlation between GDP per capita and traffic congestion across the cities analyzed; Identified Bogotá as a priority candidate for transportation infrastructure investment, considering its high congestion, moderate economic productivity, and 11.3M inhabitants.

EDUCATION

Data Analyst Certificate | TripleTen

2026

B.S. in Mechatronics Engineering | Tecnológico de Monterrey

2019 – 2023

CERTIFICATIONS

- SOLIDWORKS Associate (CSWA)

LANGUAGES

Spanish (Native) | English (B2 – High Intermediate)

Able to communicate effectively in professional settings, participate in meetings and conversations, read and understand technical documentation, write professional messages and reports, and clearly express ideas in English.
